Experience

- C/S Network Technician**, Office of Defense Services – Wilmington, DE Sept 2025 – present
- Developed and maintained a new IT ticketing system, improving issue tracking, resolution efficiency, and ticket metric tracking and analysis.
 - Provide technical support to staff and users, resolving hardware and software issues promptly.
 - Assist in the installation, configuration, and maintenance of IT infrastructure, including servers, workstations, and networking equipment.
 - Collaborate with team members to implement IT projects and upgrades, ensuring minimal disruption to operations.
- IT Intern**, RCM Healthcare Services – New York, NY (Summers) May 2024 – Aug 2025
- Reduced laptop provisioning and setup time by 50%, enhancing operational efficiency and productivity.
 - Contributed to the development of a company-wide email management naming scheme, improving organization and consistency.
 - Supported the research and implementation of new IT asset management tools, streamlining asset tracking and resource allocation.
- Teaching Assistant – CISC210: Introduction to Systems Programming**, University of Delaware – Newark, DE Feb 2024 – May 2024
- Provided support for student projects involving embedded systems and interactive objects.
 - Held weekly office hours to offer one-on-one guidance on debugging, low-level programming, and efficient resource usage.
 - Graded assignments and labs with attention to correctness, style, and performance.
 - Reinforced key concepts such as pointer arithmetic, memory allocation, and interfacing with hardware.
 - Guided students in understanding and applying system-level constraints in code design.
- Product Analysis Intern**, Radulescu LLP — Patent Litigators – Roslyn, NY January 2023/24
- Disassembled and organized hundreds of LED bulbs.
 - Developed a nomenclature system to organize the bulbs inside Microsoft Excel, increasing bulb look-up time by 50 percent.
 - Analyzed the type of LED on the PCB and the markings on the PCB of each bulb to classify which factory the bulb originated from.
- Assistant Division Leader / Assistant Head of Woodshop**, Camp Scatico – Elizaville, NY (Summers) May 2021 – Aug 2023
- Fostered an open and welcoming environment to allow children to strengthen and make new connections.
 - Created and organized personalized workout plans for 50+ campers, helping them to further their knowledge of fitness as well achieve their fitness goals.
 - Directed and developed a woodworking program to teach kids valuable project design and problem-solving skills.

Projects

- Homelab | Proxmox, Ubuntu, Docker** Sept 2021 – present
- Deployed and managed multiple Proxmox Virtual Environment instances across varied hardware to host multiple operating systems and services.
 - Configured Ubuntu 22.04/23.04 with virtual machines, LXC containers, and Docker (Compose and Run) for media streaming, network administration, remote management, DNS filtering, and more.
 - Designed resilient storage solutions with real-time service monitoring and automated Discord webhook alerts, reducing downtime by 20%.
- IT Dashboard | NestJS, Next.js 15, TypeScript, PostgreSQL, Prisma, Better Auth, Tailwind CSS, Radix UI, Docker, Turborepo**
- Built a full-stack IT ticketing system with role-based access control (USER, TECH, ADMIN) and Microsoft OAuth authentication for the Office of Defense Services.
 - Implemented comprehensive ticket management with file attachments, email notifications, real-time status tracking, and analytics dashboard with resolution time metrics.
 - Designed a scalable monorepo architecture using Turborepo with shared packages for database, API utilities, and TypeScript configurations.
 - Integrated MinIO object storage for file management and Microsoft Graph API for enterprise authentication, improving security and scalability.
- Personal Portfolio Website | React 18, TypeScript, Vite, Tailwind CSS, Framer Motion, Lucide React, Cloudflare Pages**
- Developed a modern responsive portfolio website showcasing projects, skills, and experience.
 - Implemented interactive animations, gradient borders, image modals, and a terminal-style project demo.
 - Optimized performance and developer experience with TypeScript, Vite, and PostHog analytics.
- Snipe-IT License Import Script | Python, REST API, Pandas, CSV/Excel, Automation**
- Created a Python automation script for bulk assignment of software license seats in Snipe-IT.
 - Integrated with the REST API to handle CSV/Excel imports with rate limiting and error handling.
 - Improved IT asset management efficiency by eliminating repetitive manual input.
- Construct-a-Flow AI Web | React 18, TypeScript, Vite, Tailwind CSS, shadcn/ui, Radix UI, TanStack Query, Cloudflare Pages**
- Built the official website for Construct-a-Flow AI, a modern web application automating the construction bid process with AI.
 - Integrated Gmail API for communication and deployed with Cloudflare Pages for scalability.

Education

- University of Delaware**, Bachelor of Science in Computer Science – Newark, DE Aug 2022 – May 2026
 Minor in Computer Engineering

Skills

Languages: Java, Python, C/C++, HTML/CSS, JavaScript/TypeScript
Developer Tools: Git/Github, Docker, Visual Studio Code, IntelliJ, NPM, Cloudflare Pages
Frameworks and Build Tools: React, Vite, Tailwind CSS, Shadcn/UI, Pandas, Express, REST API, Framer Motion
Operating Systems: Windows, MacOS, Proxmox, Ubuntu, Debian, Unix
